

ATM75cH

The Audio-Technica ATM75cH is a high-quality cardioid condenser headset microphone designed for professional hands-free vocal applications. With a comfortable, secure headband and a pivot-mounted boom, it provides excellent stability and precise positioning. Its cardioid pickup pattern ensures focused audio capture with minimal background noise, making it ideal for active performers, fitness instructors, and presenters. The cH model includes a screw-down 4-pin connector for use with Audio-Technica cH-style wireless body-pack transmitters.
