

Motorised

Retractable

EDEN Extra bright motorised floor screen, an innovative projection screen dedicated to short-throw video projection, for maximum installation freedom.

Equipped with the latest ALR (Ambient Light rejection) technology, the EDEN motorised floor screen allows you to achieve a large projection screen in any room, with a modern ultra-short throw projector. This technology gives you better image contrast by reducing the reflection of ambient light. Retractable thanks to its aluminium joints, the EDEN Extra Bright screen disappears entirely into its housing when not in use. It will allow you to have a great picture in any room only when you want it.

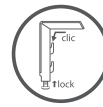

The Cinema experience, without constraints, wherever you want...

Perfect tension
