STOCKHOLM 1100

Vinyl Furniture

DIMENSIONS

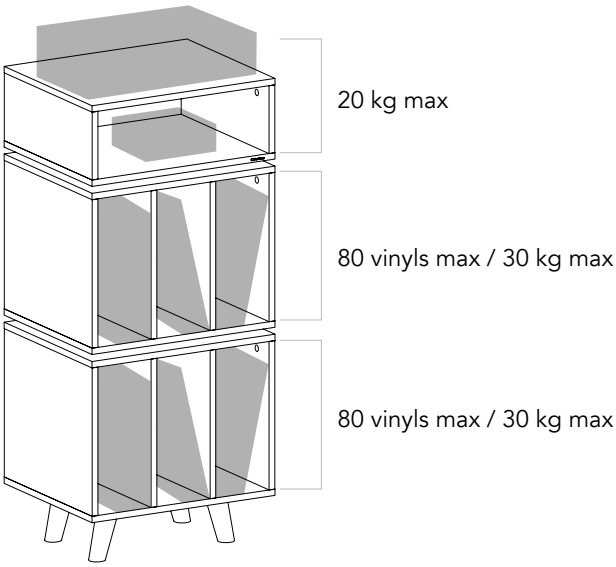

DESCRIPTION

The Stockholm 1100 takes the DNA of the Stockholm 700 and adds a second level of storage for vinyl records.

It offers two dedicated tiers with three vertical compartments, making it easy to organise your collection. As with the 700 version, the upper section accommodates electronics with a height of 160 mm and a width of 450 mm, a format suitable for most amplifiers and pre-amplifiers on the market. The top shelf provides space for a turntable, transforming the unit into a true all-in-one solution that can hold vinyl records, electronics and a turntable in a space-saving design.

The Stockholm 1100 is available in two finishes: white and light oak or black and walnut.
