

INTERFACE SWITCH 12 Volt FOR PROJECTION SCREENS

The 12 Volt **INTERFACE SWITCH** is a switcher based on a relay that drives the opening and the rising up of a motorized screen, depending if there is or not a continuous 12 Volt DC power.

It can be used with video-projectors, amplifiers or Home Theatre decoders that have an output of 12 Volt DC.

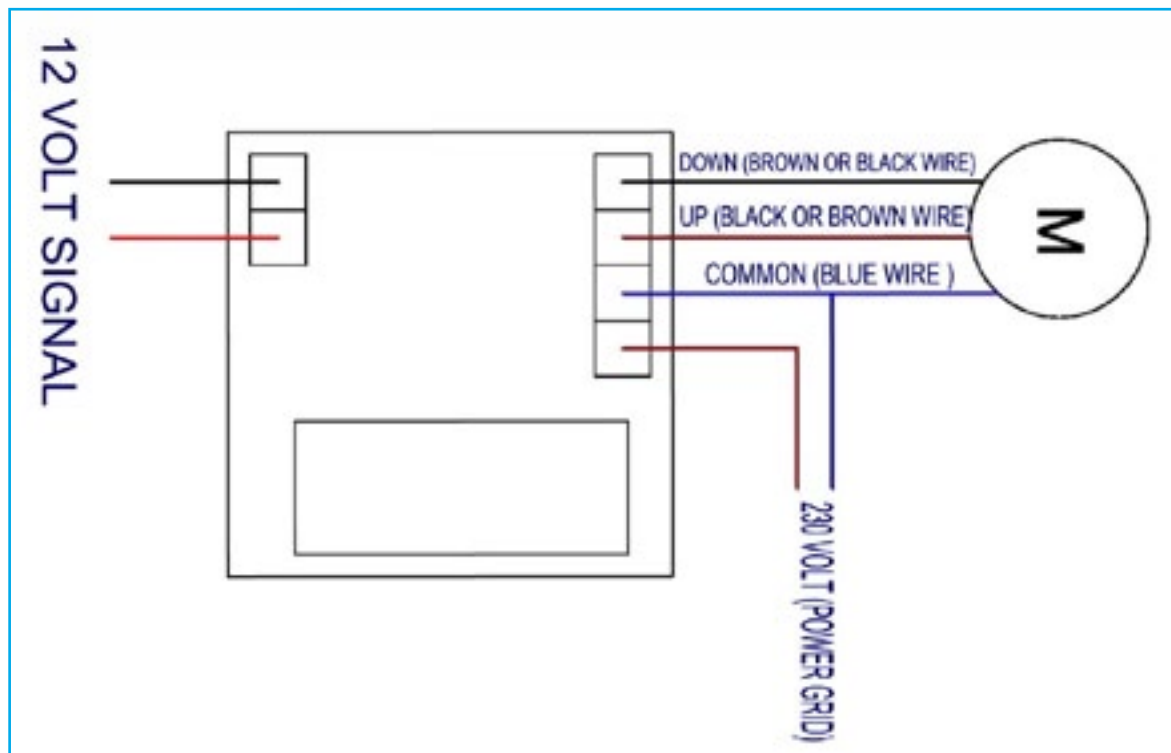

If you install 12 volt interface you cannot use neither a remote control nor a switcher in order to switch on/off the screen.

Warranty
24 months
