spectrum

After the success of the first Spectrum speakers, Tangent decided to complete the range and now offers 3 new models : column speakers, a center speaker, and a subwoofer.

Enjoying the same quality of manufacturing and finishing than their predecessors, these new speakers allow you to create a beautiful 5.1 system. The sound of the Spectrum X6 is faithfully reproduced by two 130 mm bass-midrange speakers and a 25 mm dome fabric tweeter. The center speaker and subwoofer are not left out since they respectively enjoy two 100 mm woofers and a 200 mm woofer, delivering accurate sound, creating a remarkable sound experience.
